

Esker DeliveryWare 5.0 and SAP®

Connecting Document Delivery
with Business Success

While business process efficiency takes a quantum leap forward with SAP software solutions, gains are limited by slow and costly mail or manual fax delivery of business documents. Automating document delivery offers valuable advantages — and a clear challenge to success-minded businesses today.

Relevant data (document number, document date, line item details, etc.) are captured using advanced pattern recognition.

Captured data is simultaneously analysed and validated against SAP master data, then transferred to the SAP SD, FI or MM applications depending on the type of document.

Implementing Esker DeliveryWare takes document delivery outside of SAP, integrating easily with any SAP application module to deliver fast and highly visible results:

- **Streamline** invoicing, collections, procurement, accounts payable, and any other business process by automating the intercompany exchange of SAP documents
- **Simplify** the IT infrastructure by replacing multiple document delivery touch points with a single solution
- **Shorten** cash conversion cycles, reduce labour costs, and increase return on IT investments

How do you streamline the rest of the business process?

Esker DeliveryWare and SAP solutions work together to help businesses achieve their full potential. Intelligent DeliveryWare Rules automation and SAP-certified integration unite in a comprehensive business document server to...

- **Complete the circle of streamlined information exchange**, automating the flow of business documents from and to SAP solutions — via the most efficient means and in the most effective formats
- **Reap the rewards of faster, easier, more flexible communication** — without the risks of custom programming or the expense of consultants
- **Eliminate the cost and time of manual tasks** such as printing, folding, stuffing, and mailing or faxing outgoing documents — as well as error-prone manual entry of incoming data
- **Enable immediate delivery** (and notification) of personalised reports, invoices, purchase orders, acknowledgements, and other business documents — from virtually any enterprise source to any destination
- **Leverage powerful document** formatting capabilities to customise SAP documents — and enhance business communication

Why Esker?

Esker DeliveryWare is built for business. With a rich heritage in the world of large-scale computing, Esker DeliveryWare comes from a proven SAP software partner and a leading worldwide provider of document delivery solutions. Strategic alliances with SAP global software partners demonstrate Esker's expert capabilities in extending and enriching SAP solutions.

“The top reasons we selected Esker DeliveryWare over other document delivery solutions were its ease of use and the seamless integration with our existing SAP infrastructure.”

Mike Green ■ Technical Analyst ■ MEDRAD

Bringing Business directly into SAP

Esker DeliveryWare provides an automated environment for intelligent processing of incoming sales orders and vendor invoices leveraged through the SAP system.
